## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-24 allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record (J.P. 09-091705 to Sakurai Tatsuaki) discloses a calculating a write condition detection index ( $R_m$ ), the method determining an index that is indicative of a write condition for an optical disk when information is written to the optical disk, the method comprising the steps detecting, as a light intensity level ( $S_p$ ) a stable-intensity portion of light reflected when the disk is irradiated with laser beams with power ( $P_{w1}$ ) that is sufficient to generate pit portions and detecting, as a light intensity level ( $S_s$ ) the intensity of light reflected from a space portion when the disk is irradiated with laser beams with power that is insufficient to generate pit portions.

However, in regard with claims 1,7,11 and 23, Applicant's claimed invention is deemed allowable over the prior art of record as the prior art of record fails to teach or suggest either alone or in combination determining said index using the equation:

$$R_m = S_p/S_s/(P_{w1})^2 = \frac{S_p(P_{w1})^2}{S_s}$$

Art Unit: 2655

And, in regard with claims 4,15,19 and 24, Applicant's claimed invention is deemed allowable over the prior art of record as the prior art of record fails to teach or suggest either alone or in combination determining said index using the equation:

$$R_m = \frac{S_p}{(P_{w1})^2} ; \text{specifically using } (P_{w1})^2$$

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
